Engineering and Applied Sciences (EAS) is a peer-reviewed and open access journal, which is committed to promoting and publishing original high quality research papers in the entire spectrum of engineering and applied science. The journal prefers the submitted manuscript, which meets the internationally accepted criteria and the style of the journal for the purpose of both reviewing and editing.

Applied mechanics (also engineering mechanics) is the branch of the physical sciences and the practical application of mechanics. Pure mechanics describes the response of bodies (solids and fluids) or systems of bodies to external forces. Some examples of mechanical systems include the flow of a liquid under pressure, the fracture of a solid from an applied force, or the vibration of an ear in ...

Journal of Computational and Applied Research in Mechanical Engineering (JCARME) invites you to consider submitting original research papers for possible publication after peer review. The scope of this international, scholarly journal is aimed at rapid dissemination of new ideas and techniques and to provide a common forum for significant research and new developments in areas of Mechanical ...

Thermodynamics is the branch of physics that has to do with heat and temperature and their relation to energy and work. The behavior of these quantities is governed by the four laws of thermodynamics, irrespective of the composition or specific properties of the material or system in question. The laws of thermodynamics are explained in terms of microscopic constituents by statistical mechanics.

International Journal of Transportation Engineering and Technology (IJTET) involves the design, manufacture and upkeep of aircraft, spacecraft and all types of transportation mean. The journal deals with the design, construction, and study of the science behind the forces and physical properties of crafts, vessels and vehicles. The field also covers their aero-hydrodynamic characteristics and ...
