International Journal of Industrial and Manufacturing Systems Engineering (IJIMSE) publishes state-of-the-art fundamental and applied research in manufacturing at the systems level. It aims at imparting fundamental knowledge to develop the ability to address complex industrial issues, highlighting how to design, run, control and optimize production systems.

Systems engineering is an interdisciplinary field of engineering and engineering management that focuses on how to design and manage complex systems over their life cycles. At its core, systems engineering utilizes systems thinking principles to organize this body of knowledge. The individual outcome of such efforts, an engineered system, can be defined as a combination of components that work ...

Automatic process control in continuous production processes is a combination of control engineering and chemical engineering disciplines that uses industrial control systems to achieve a production level of consistency, economy and safety which could not be achieved purely by human manual control. It is implemented widely in industries such as oil refining, pulp and paper manufacturing ...
