Coordinator of Undergraduate Studies: Prof. Joel Plawsky (plawsky@rpi.edu) Objectives of the Undergraduate Curriculum. The Howard P. Isermann Department of Chemical and Biological Engineering bachelor's degree program is designed to prepare students for continued learning and successful careers in industry, government, academia, and consulting.

### **Undergraduate Study in Chemical & Biological Engineering**

Polyisocyanurate, also referred to as PIR, polyiso, or ISO, is a thermoset plastic typically produced as a foam and used as rigid thermal insulation. The starting materials are similar to those used in polyurethane (PUR) except that the proportion of methylene diphenyl diisocyanate (MDI) is higher and a polyester-derived polyol is used in the reaction instead of a polyether polyol.

Mechatronics, which is also called mechatronic engineering, is a multidisciplinary branch of engineering that focuses on the engineering of both electrical and mechanical systems, and also includes a combination of robotics, electronics, computer, telecommunications, systems, control, and product engineering. As technology advances over time, various subfields of engineering have succeeded in ...

The MSc course provides students with the knowledge and understanding of the state-of-the-art in one or more of the many areas of mechanical engineering within our department. Our Department of Mechanical Engineering is one of the largest mechanical engineering departments in the world, with topics ...

### **MSc Advanced Mechanical Engineering | Study | Imperial**

Our Earthquake and Structural Engineering MSc programme focuses on engineering approaches for structural and geotechnical seismic analysis and design.

### **Earthquake and Structural Engineering MSc**

You continue to cover core modules and laboratory work in years three and four. You also begin to tailor the

course to your interests by choosing from a selection of optional modules on specialist topics. This gives you the chance to focus on the areas of aeronautical engineering that interest you the most and tap into cutting-edge research activities being undertaken by internationally ...

This module will introduce you to the equipment and methods used in both land and construction engineering surveying. The module will provide you with a thorough grounding in both the theoretical and practical aspects of surveying and covers a range of surveying topics from basic measurement of heights, distances and angles, to setting out coordinate positions on site.

*Agrobacterium tumefaciens* is widely used as a versatile tool for development of stably transformed model plants and crops. However, the development of *Agrobacterium* based transient plant transformation methods attracted substantial attention in recent years. Transient transformation methods offer several applications advancing stable transformations such as rapid and scalable recombinant ...
