Growth Mindset in Context Content and Culture Matter Too

The What the Hell is it Actually Called Blue Box. The cerebrum is the whole big top/outside part of the brain but it also technically includes some of the internal parts too.. Cortex means "cork" in Latin and is the word used for the outer layer of many organs, not just the brain. The outside of the cerebellum is the cerebellar cortex. And the outside of the cerebrum is the cerebral cortex.

Neuralink and the Brain's Magical Future " Wait But Why

Everyone learns differently, that's nothing new. However, over the years the different styles of learning have usually been cut down to visual, physical (learn-by-doing), or audible. Truth is, we could probably dissect each of these learning three styles down even further and arrive at a handful of sub-levels. Learning is a complicated concept as everyone's!

7 Major Learning Styles - Which One are You? - LearnDash

In a general sense, we actually need and use all of the brain's capacity. The idea that we use just 10% or so is a myth. We would not have evolved an organ that uses 20-25% of the oxygen and glucose in our blood " even though it's just 2-3% of our bodyweight " if we (and our ancestors) did not need every bit of it.
