An Introduction in Structural Equation Modeling

Quality control (QC) is a process by which entities review the quality of all factors involved in production.ISO 9000 defines quality control as "A part of quality management focused on fulfilling quality requirements".. This approach places an emphasis on three aspects (enshrined in standards such as ISO 9001): Elements such as controls, job management, defined and well managed processes ...

The purpose of this page is to provide resources in the rapidly growing area of computer-based statistical data analysis. This site provides a web-enhanced course on various topics in statistical data analysis, including SPSS and SAS program listings and introductory routines. Topics include questionnaire design and survey sampling, forecasting techniques, computational tools and demonstrations.

Often, raster images have a specified resolution stored separately from the pixel values (a.k.a. metadata).This resolution metadata isn't really an integral part of the raster image, though it can be useful for conveying important information, such as the scale factor of a microscope or the physical size at which an image is intended to be printed. . Similarly, vector images may use a physical ...

Introduction. Statistical inference makes propositions about a population, using data drawn from the population with some form of sampling.Given a hypothesis about a population, for which we wish to draw inferences, statistical inference consists of (first) selecting a statistical model of the process that generates

the data and (second) deducing propositions from the model.
