I have replaced the drive belt, I have replaced the pto switch , (and the blades engage when the engine is running),, I have checked the back pull lever to make sure the mower drive is engaged and is not in the push by hand position. The mower will start,, the blades will engage,, but the mower will not move forward

or backward. Anyone ever have this problem?

Internal combustion engines can contain any number of combustion chambers (cylinders), with numbers between one and twelve being common, though as many as 36 (Lycoming R-7755) have been used. Having more cylinders in an engine yields two potential benefits: first, the engine can have a larger displacement with smaller individual reciprocating masses, that is, the mass of each piston can be less ...
