Fig. 2 shows that there are five aspects of cultural contexts: the two original cultures (A and B), the two changing ethnocultural groups (A² and B²), and the nature of their contact and interactions. These five sets of phenomena define the nature of acculturation process at the cultural level, and establish the starting point for the process of acculturation at the psychological level.

A Living Will, also known as an "Advance Directive", allows a person to state their end-of-life medical treatment and care. This document does not hold any bearings after death, it solely directs physicians to care for a person based on what is stated in their Living Will, especially with issues such as DNR (do not resuscitate). Without this document, it's difficult to judge an ill or ...

How To Measure Resilience: 8 Resilience Scales For Youth

In polymer chemistry, living polymerization is a form of chain growth polymerization where the ability of a growing polymer chain to terminate has been removed. This can be accomplished in a variety of ways. Chain termination and chain transfer reactions are absent and the rate of chain initiation is also much larger than the rate of chain propagation. The result is that the polymer chains ...

Partnership for Solutions Introduction During the 20th century, advances in modern medicine and public health contributed to steady increases in life expectancy in the United States. Now in the 21st century, Americans can expect to live longer than any previous generation. However, along with the aging of the population, there has been an increase in the number of Americans living with one or ...
