

nothing special pdf

In computing, "nothing" can be a keyword (in VB.Net) used in place of something unassigned, a data abstraction. Although a computer's storage hardware always contains numbers, "nothing" symbolizes a number skipped by the system when the programmer desires.

Nothing - Wikipedia

The nothing to hide argument states that government surveillance programs do not threaten privacy unless they uncover illegal activities, and that if they do uncover illegal activities, the person committing these activities does not have the right to keep them private.. A person who favors this argument may state "I've got nothing to hide" and therefore does not express opposition to ...
