Mathematical physics refers to the development of mathematical methods for application to problems in physics. The Journal of Mathematical Physics defines the field as "the application of mathematics to problems in physics and the development of mathematical methods suitable for such applications and for the formulation of physical theories". It is a branch of applied mathematics, but deals ...

A four-dimensional space or 4D space is a mathematical extension of the concept of three-dimensional or 3D space. Three-dimensional space is the simplest possible generalization of the observation that one only needs three numbers, called dimensions, to describe the sizes or locations of objects in the everyday world. For example, the volume of a rectangular box is found by measuring its length ...

Le mot physique prend son sens moderne, plus restreint et mieux défini que le sens original, au XVIII e siècle avec Galilée. Selon lui, les lois de la nature s'écrivent en langage mathématique. Les principes d'inertie et de relativité ainsi que les lois découvertes semblent contredire le sens commun.
