François Viète's work on new algebra at the close of the 16th century was an important step towards modern algebra. In 1637, René Descartes published *La Géométrie*, inventing analytic geometry and introducing modern algebraic notation. Another key event in the further development of algebra was the general algebraic solution of the cubic and quartic equations, developed in the mid-16th ...

Grade 6 Module 4: Expressions and Equations. In Module 4, Expressions and Equations, students extend their arithmetic work to include using letters to represent numbers in order to understand that letters are simply "stand-ins" for numbers and that arithmetic is carried out exactly as it is with numbers.
