Governance comprises all of the processes of governing - whether undertaken by the government of a state, by a market or by a network - over a social system (family, tribe, formal or informal organization, a territory or across territories) and whether through the laws, norms, power or language of an organized society. It relates to "the processes of interaction and decision-making among the ...

All countries are investing in health data. There are however significant cross-country differences in data

availability and use. Some countries stand out for their innovative practices enabling privacy-protective data use while others are falling behind with insufficient data and restrictions that limit access to and use of data, even by government itself.

Big data analytics and other innovative uses of personal data can produce tremendous social and economic value. They can also erode privacy, undermine cybersecurity, and deepen inequality. One of the keys to reducing these undesired impacts, and so to unlocking data's many benefits, is good governance. The Program on Data and Governance seeks to identify [â€¦]
