Ocular Graft-versus-Host Disease after Hematopoietic Cell Transplantation: Expert Review from the Late Effects and Quality of Life Working Committee of the Center for International Blood and Marrow Transplant Research and Transplant Complications Working Party of the European Society of Blood and Marrow Transplantation

### **Biology of Blood and Marrow Transplantation Home Page**

Interleukin 9, also known as IL-9, is a pleiotropic cytokine (cell signalling molecule) belonging to the group of interleukins. IL-9 is produced by variety of cells like mast cells, NKT cells, Th2, Th17, Treg, ILC2, and Th9 cells in different amounts. Among them, Th9 cells are regarded as the major CD4+ T cells that produce IL-9.

### **Interleukin 9 - Wikipedia**

Interleukin 3 (IL3) is a cytokine that regulates hematopoiesis by controlling the production, differentiation and function of granulocytes and macrophages. The protein, which exists in vivo as a monomer, is produced in activated T cells and mast cells, and is activated by the cleavage of an N-terminal signal sequence. IL3 is produced by T lymphocytes and T-cell lymphomas only after stimulation ...

Our lab seeks to elucidate how leukocytes shape and are shaped by inflammation. We work with models of acute and chronic inflammation relevant to infectious, cardiovascular, and metabolic diseases, and focus on cell development, communication, and function.

**LISTEN NOW.** Richard Marais (Cancer Research UK Manchester Institute, UK) finds that circulating cell-free DNA is a surrogate marker of tumour burden in patients with metastatic melanoma. He tells Helen Saul that a simple blood test could predict overall survival.. Plasma total cell-free DNA (cfDNA) is a surrogate biomarker for tumour burden and a prognostic biomarker for survival in metastatic ...
