

the black hole of pdf

A black hole is a region of spacetime exhibiting such strong gravitational effects that nothing—“not even particles and electromagnetic radiation such as light”—can escape from inside it. The theory of general relativity predicts that a sufficiently compact mass can deform spacetime to form a black hole. The boundary of the region from which no escape is possible is called the event horizon.

Black hole - Wikipedia

A rotating black hole is a black hole that possesses angular momentum. In particular, it rotates about one of its axes of symmetry.

Rotating black hole - Wikipedia

A black hole is conventionally thought of as an astronomical object that irrevocably consumes all matter and radiation which comes within its sphere of influence.

What exactly is a black hole? - phys.org

This legitimizes the use of hydrodynamic processes to investigate the phenomena typical of black holes. In the new study, Richartz and collaborators analyzed the relaxation (ringdown) process in a ...
