A (population) effect size  $\hat{d}$ , based on means usually considers the standardized mean difference between two populations:  $\hat{d} = \frac{\bar{x}_1 - \bar{x}_2}{s_f}$ , where  $\bar{x}_1$  is the mean for one population,  $\bar{x}_2$  is the mean for the other population, and  $s_f$  is a standard deviation based on either or both populations.. In the practical setting the population values are typically not known and must be estimated from sample ...

The Ringelmann effect is the tendency for individual members of a group to become increasingly less productive as the size of their group increases. This effect, discovered by French agricultural engineer Maximilien Ringelmann (1861–1931), illustrates the inverse relationship that exists between the size of a group and the magnitude of group members' individual contribution to the ...

1. Introduction. Do high levels of public debt reduce economic growth? This is an important policy question. A positive answer would imply that, even if effective in the short-run, expansionary fiscal policies that increase the level of debt may reduce long-run growth, and thus partly (or fully) negate the positive effects of the fiscal stimulus.
